**Summary**

There are no recorded files available from server to support the above claim. The files were uploaded into a local storage and then manipulated in order to complete the final table as shown on the official website.

SRseries takes responsibility for any mistake or technical that may occur always promoting the good behavior of all, including the organization's.

Although there are no evidences of any technical problem and because there were no live streaming for this event and that the laps could be done 'solo' on track without any live race directors, SRseries takes in consideration that the driver effectively did a 2:23s lap time.

SRseries has taken this into consideration for future events and changed procedures to avoid similar doubts in the future.
